CATALOGUE 2026

Our Story

She Burns was founded by Emily, a proud Kamilaroi and Gubbi Gubbi woman, with a vision to create refined home fragrance rooted in intention, memory, and quiet luxury.

Inspired by early experiences of candle making alongside her grandmother, the brand is grounded in tradition and craftsmanship.

The warmth of melted wax, the familiarity of layered scent, and the ritual of creating something by hand continue to shape the foundation of She Burns today.

Each collection is thoughtfully developed to evoke softness and depth while maintaining a modern, understated aesthetic. Our fragrances are carefully curated to feel balanced, sophisticated, and enduring. Designed to complement contemporary interiors, She Burns products sit seamlessly within elevated retail environments and curated home spaces.

Every candle is hand poured in small batches using premium fragrance blends and high quality materials to ensure consistency, performance, and a clean, even burn. From our signature 150ml and 350ml vessels to our wax melts and DIY experiences, each piece reflects careful attention to detail and considered design.

She Burns is more than home fragrance. It is atmosphere. It is ritual. It is the art of creating spaces that feel composed, warm, and quietly luxurious.

Poured with love. Always. ✨
